

ODD 2023
Tutorial Sheet – 13

Structures & Union

Software Development Fundamentals – I (15B11CI111)

Course Outcomes (CO)	
CO1	Explain various phases of software development life cycle
CO2	Explain various data types, memory allocation schemes, precedence of arithmetical and logical operations, and need of array, and structures
CO3	Draw the flow chart and write the high level code for different problems
CO4	Apply and implement functions with or without pointers for different problems
CO5	Demonstrate and implement various operations like traverse, insertion, deletion, <i>etc.</i> on files

Note: Students are advised to submit their solutions to their respective tutorial faculty.

Q1) [CO4] Pointer to structures:

Write a C program using pointer to create a typedef structure “telephone” which is made up of a string (that is used to hold the name of the person) and an integer (that is used to hold the telephone number).)

Q2) Write a C program to create record of 25 students using structure students(with member as date of birth, name, roll no. and total marks) and also struct dob (with members as year, month and date) for storing the date of birth of each student.

Q3) Write a menu driven program in 'C' which shows the working of library. The menu option should be

- i) Add book details.
- ii) Display book details.
- iii) List all books of given author.
- iv) List the count of books in the library.
- v) Exit.

Q4) Write a menu driven program in C to create a structure employee having fields empid, empname, salary. Accept the details of 'n' Employees from user and perform the following operations using function.

- Search by Emp-Id
- Display All
- Display Names of Employee having Salary > 10000.
