

ODD 2023
Tutorial Sheet - 11

Software Development Fundamentals – I (15B11CI111)

Course Outcomes (CO)	
CO1	Explain various phases of software development life cycle
CO2	Explain various data types, memory allocation schemes, precedence of arithmetical and logical operations, and need of array, and structures
CO3	Draw the flow chart and write the high level code for different problems
CO4	Apply and implement functions with or without pointers for different problems
CO5	Demonstrate and implement various operations like traverse, insertion, deletion, etc. on files

Note: Students are advised to submit their solutions to their respective tutorial faculty.

Q1. [CO4] A child is taking his daily lessons on mathematics from online classes. Today he is learning about the counting of stars. He starts counting as one star, two stars, three stars ... then 49 stars and finally 50 stars. Help the child in summing up his counting of the number of stars using recursive function.

Q2. [CO4] Write a program in C to print even or odd numbers in a given range using recursive function.

Q3. [CO4] Write a program in C to check if a number is a prime number or not using recursion.

Q4. [CO4] Write a program in C to copy one string to another using recursion.

Q5. [CO4] Write a program in C to find the largest element of an array using recursion.
